

The XWeb application was developed for full integration with InnuxTime as support to the management of attendance. This software works with Xerox WorkCentres, enabling its users to view and print attendance reports at the workplace through the printing devices used daily, which ensures greater control over the flow and safety of company documents.

Features

Allows clocking in and out. These clockings may be entries, exits or automatically calculated.

Allows viewing of attendance records on the workcentre LCD.

Allows you to view and print schedule plans.

Easily view and print attendance records, your absenteeism, their justifications, the number of hours worked.

Easily view and print reports of clocking made.

Software Language: Microsoft C #. NET Framework and EIP.

Multi-user.
