InnuxSports is an integrated Gyms and HealthClubs management system that allows you to process the information associated with your establishment in particular the management of its members, greeting cards, quotas, schedules, products/services, agenda, appointments and reservations and the store or bar. It was designed for a variety of industries such as gymnasiums, healthclubs, recreational and community centres, swimming pools and aesthetic centres.

Whether you have a gymnasium with a small but growing number of members, or a healthclub with thousands of members and associated services such as activities, lessons, aesthetic activities, space reservations, a bar and much more - InnuxSports is the complete solution for you! Our simple but nonetheless highly effective tools, will help you standardize the operations of your gym or healthclub, allowing you to concentrate your efforts on more productive tasks such as recruiting new members and increasing profits.

Entries and exits of employees can be integrated with the software InnuxTime, carrying out this way and at the same time the time and attendance management of the gym using one of the market's leading solutions in this area.

Optionally you can configure InnuxSports' access monitor to view and control in real time all the access to all the spaces in the gym. This console, in addition to showing the photograph of members going in and out, displays all the irregularities that may occur in the turnstile control such as entry attempts by members with unpaid quotas or people with invalid tickets. This way you can analyze and rectify any of these situations as they occur.
